SUMMARY

- The El Niño–Southern Oscillation (ENSO) is currently neutral, although there are signs of possible El Niño development.
- The rainfall outlook generally indicates above to below normal most likely in June and June to August 2026.
- Maximum and Minimum temperatures during June and averaged over June to August 2026 are likely to be above normal over Tuvalu.

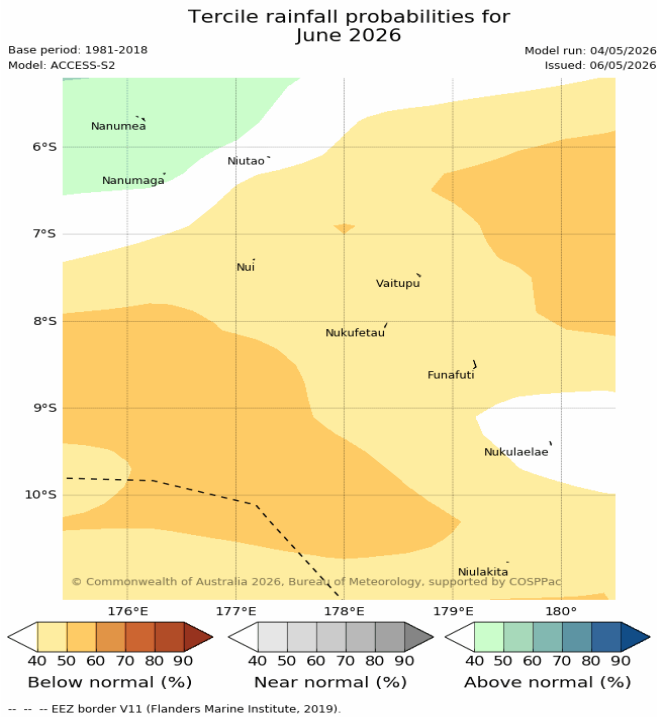

EI-NINO SOUTHERN OSCILLATION (ENSO)

- The tropical Pacific continues to warm as models suggest a transitioning to EL Niño in a coming months.
- For El Niño to be considered established, a corresponding atmospheric response would need to be observed.

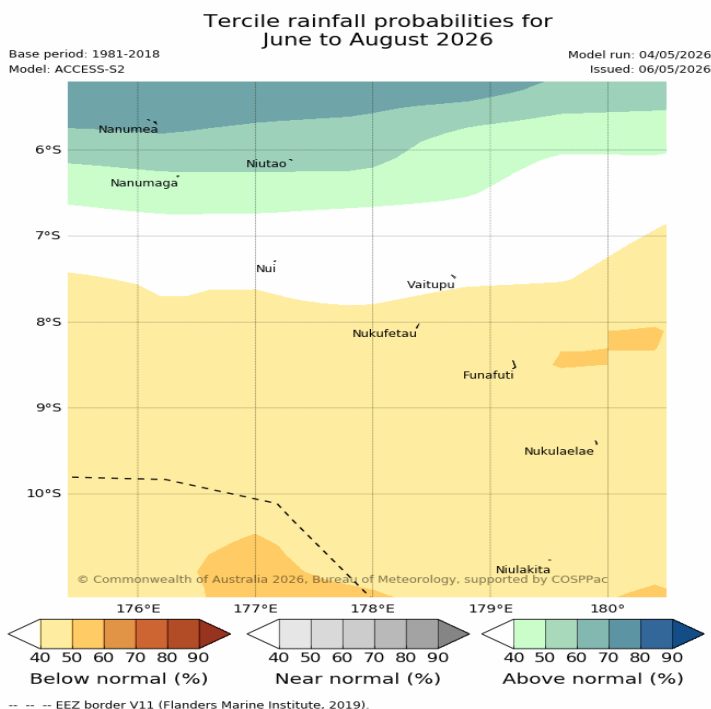

RAINFALL OUTLOOK

JUNE 2026

The rainfall for June 2026 is likely to be above normal over northern group. In the central and southern groups shows June's rainfall is likely to be below normal.

JUNE TO AUGUST 2026

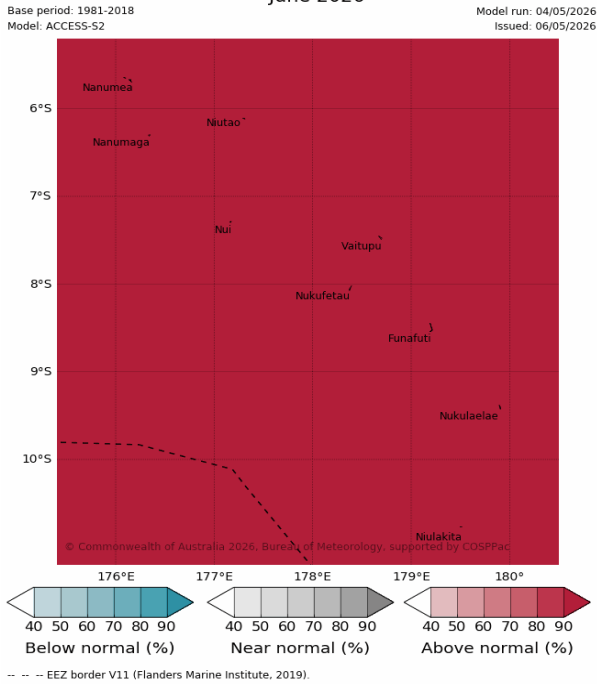

The rainfall for June to August 2026 is likely or very likely to be above normal rainfall over northern group. The outlook offer little guidance at central group, while southern group of Tuvalu is likely to be below normal.

AIR TEMPERATURE OUTLOOK

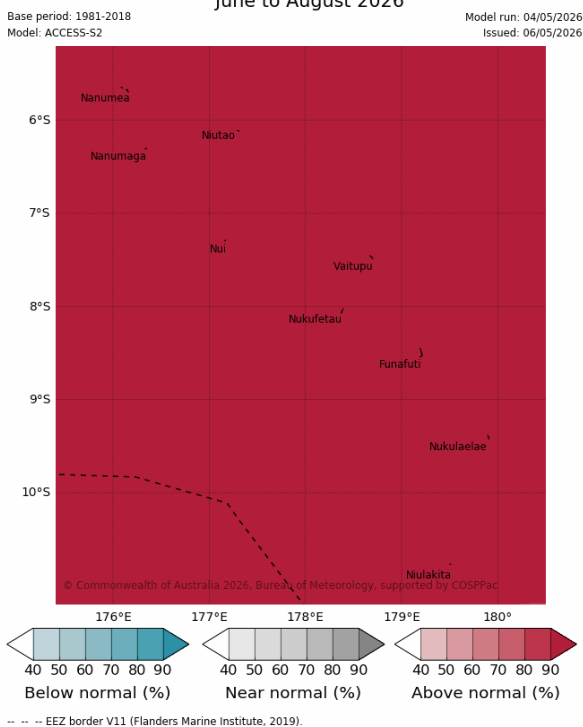

Monthly and Seasonal Minimum Temperature

Tercile minimum temperature probabilities for June 2026

June 2026 minimum temperature is very likely to be above normal across the whole group of Tuvalu.

Tercile minimum temperature probabilities for June to August 2026

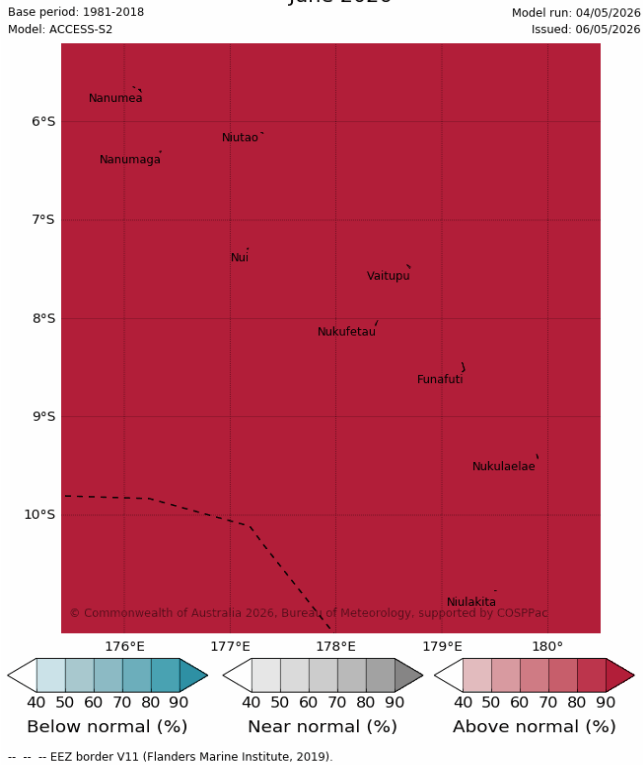

June to August 2026 minimum temperature are very likely to be above normal over Tuva-

AIR TEMPERATURE OUTLOOK

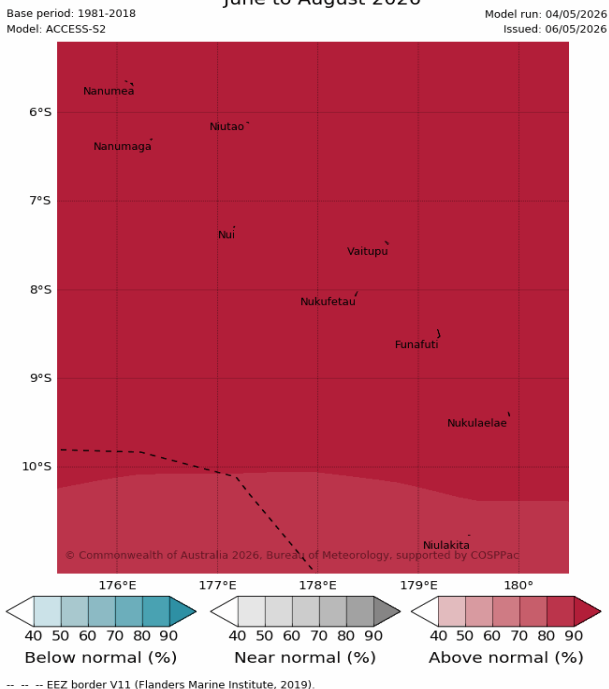

Monthly and Seasonal Maximum Temperature

Tercile maximum temperature probabilities for June 2026

Maximum temperature for June 2026 is very likely to be above normal.

Tercile maximum temperature probabilities for June to August 2026

Maximum temperature for June to August 2026 are very likely to be above normal over Tuvalu
