SUMMARY

- “The El Niño-Southern Oscillation (ENSO) remains neutral”
- The rainfall outlook generally indicates near normal most likely in July and July to September 2025.
- Maximum and Minimum temperatures during July and July to September 2025 are most likely to be above normal.

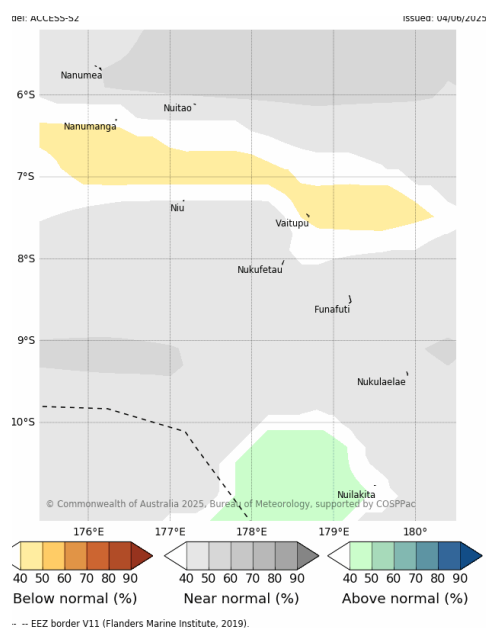

EI-NINO SOUTHERN OSCILLATION

- Global Sea Surface Temperatures remained substantially above average.
- The Bureau's models forecasts neutral ENSO conditions (neither El Niño nor La Niña) until at least November 2025. This is consistent with forecast from international models.
